

EURO LIFT & SLIDE DOOR

SIMPLY BEAUTIFUL
SIMPLY REVOLUTIONARY
SIMPLY H WINDOW

NATURAL, WARM AND INVITING APPEARANCE | SUPERIOR THERMAL PERFORMANCE

The Euro Lift & Slide door is designed to bridge the gap between the inside and the outside with superior performance and natural beauty. The heavy-duty hardware and strong aluminum/wood construction enables our Lift & Slide door to fill medium to jumbo sized openings which traditional sliders are unable to accommodate. These doors can be used in any residential or commercial projects.

- Vast array of cutting-edge 3 pane glass technology.
- Natural and warm engineered wood interior in a wide variety of species, including bamboo.
- Factory applied interior finishes available in a variety of stain and paint colors.
- Unique aluminum/wood construction for superior thermal performance, stability, and durability.

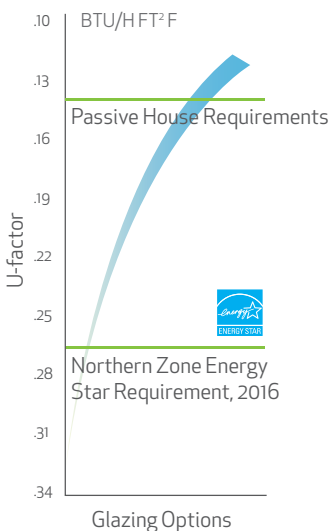

- A variety of operable/fixed configurations are available, up to 6 panels wide.
- Exterior finishes of super durable powder coat, anodizing, and Kynar®. Wood grain finishes also available.
- Dry glaze system creates less stress on glass seals and allows for ease of glass replacement.

- Glazing system is vented and weeped to ensure dissipation of any moisture.

- Custom hardware is available in a variety of styles and finishes.
